

OJCS 1418-74
8 OCT 1974

MEMORANDUM FOR: Chief, OPS Liaison, DD/O

SUBJECT : Briefing on FBI Computer Facility, 11 October
1974

1. Attached is a list of the Agency personnel who will attend the FBI computer facility briefing on 11 October 1974 at 1300 hours. Transportation to the FBI facility will be in official vehicles; vehicle license numbers will not be known until 11 October 1974.

2. We are interested in the NCIC system, and particularly in the security features which protect data and programs from unauthorized access. In addition, we are interested in any other systems which involve the searching of large files which may be accessed from many terminals.

3. The group attending the briefing consists of technically oriented managers and senior programmers who are well versed in information storage and retrieval technology. If the FBI briefers are given this background, it will allow them to drop out basic introductory material (which normally goes with a briefing of this kind), and spend more time on the technical details of the systems concerned.

HARRY E. FITZWATER
Director of Joint Computer Support
